# Ratings App

This is how the app looks when you first start it:

For the ratings app:

In the left sidebar:

1. Enter your name. Press Submit name.
2. Select the Brand whose outfits you have to annotate. Press Submit.
3. Select the type of outfit you want to annotate. Press submit.
4. Scroll down on the sidebar and you'll see the Start Annotating button. Press this to display the images.
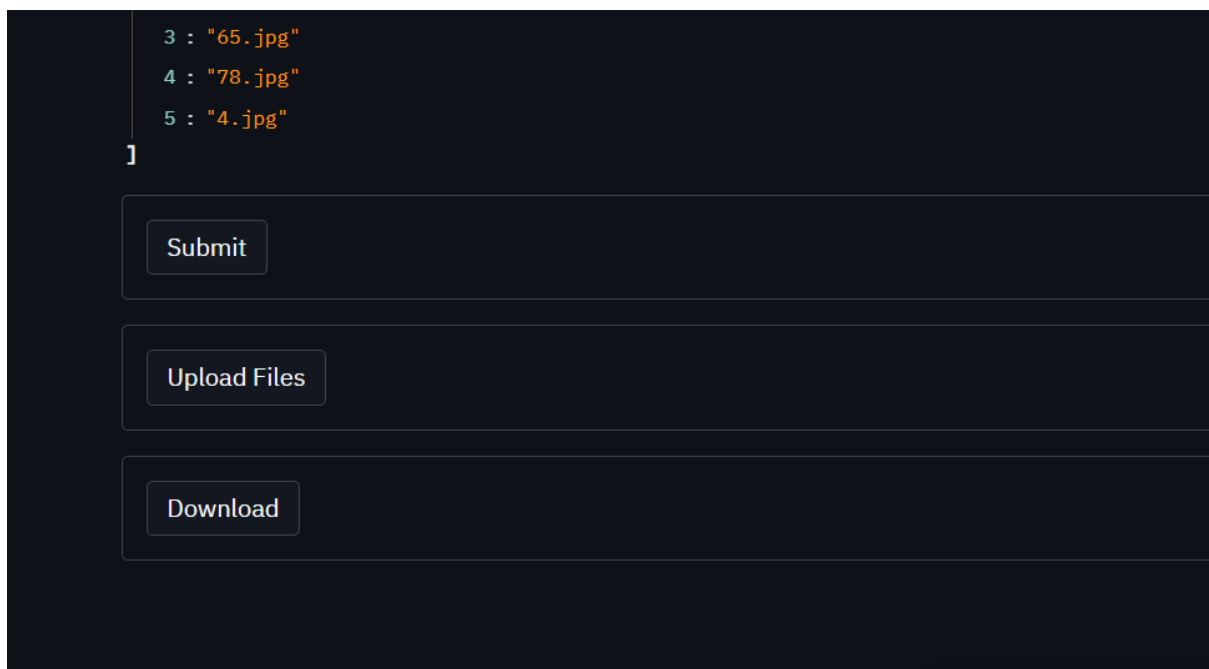

You'll come across a page much like this.

Outfit number – Navigating through outfits

Click the minus (-) button to go left, and the plus (+) button to go right.

Rating

Select how much you want to rate the outfit.

Scroll down to find the submit button:

Click the submit button to save your ratings, and move on to the next outfit using the + button above. Note that you won't see the outfit again in the app once you've rated it.

Only if you have AWS credentials available:

You can use the upload files and download buttons to upload the ratings text file to the S3 Bucket named pog-dataset.
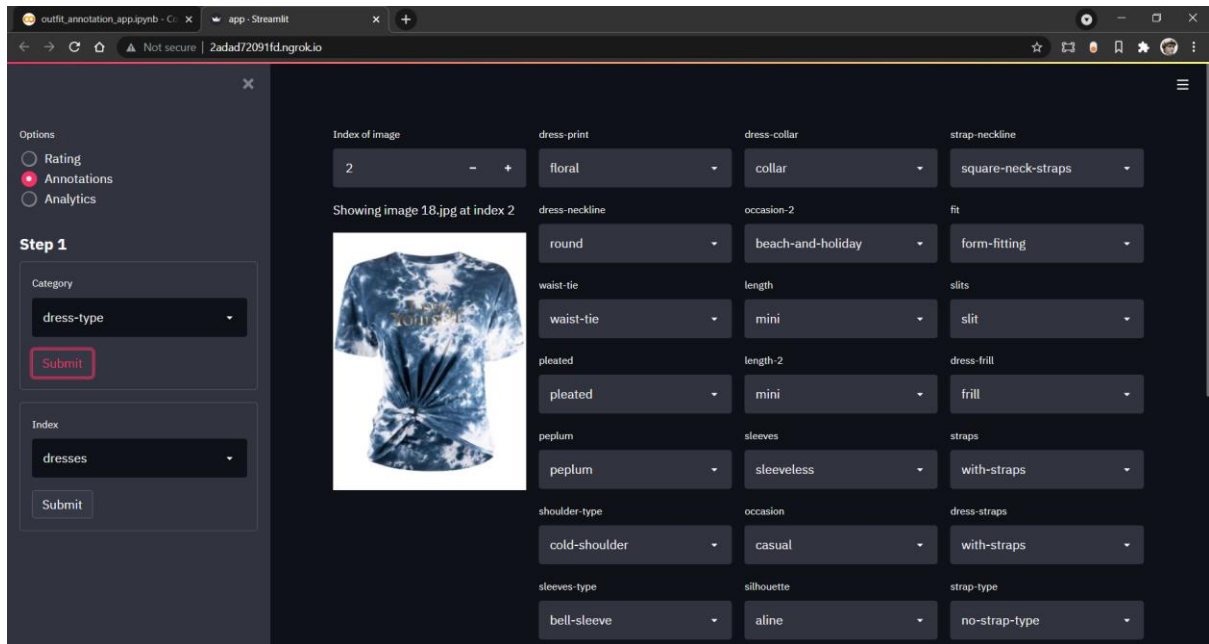

Finding your ratings file:

Your file is saved in your Google Drive with the following filename:

Annotator's name + Brand name + type of outfit + outfit index number .txt

e.g., in my case, it's sarthak_ballantynes_dress_0.txt
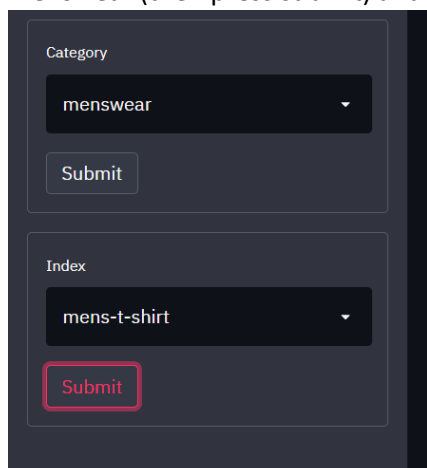

Annotations app

Click the annotations radio button in the left sidebar to open this app.

This is how it should look initially.

Note: If the image isn't loading, you can either 1. wait a while, 2. check if your connection is fast enough, or 3. Restart the app.

1. Specify the category of the product. Here we have a men's T-shirt, so in Category I select menswear (then press submit) and in Index I select men's T-shirt (and then press submit):

2. This will change the options on the right.
3. Using the dropdowns on the right, I select what kind of men's T-shirt it is:

4. After selecting all the details, click Submit, and the annotations will be saved.
5. Use the + and – buttons to go to the next and previous image respectively. Click + to go to the next image, and reselect the categories for it.
6. Make sure to click Submit after evaluating every product.

Analytics app

The first chart shows the number of annotations made on all of the categories present (Level 1 categories).

Select the level 2 and 3 sub categories to see stats on a certain type of product. Make sure to press Select after each selection.

Finally the third chart shows the detailed ratings for the chosen subcategory:

Level 4 category

jewellery-metal

Submit

Bar chart — X-axis: "Level 4 Categories" with categories gold, rosegold, silver, leaf-node, alias. Y-axis: "Number of values annotated for the category" ranging from 0 to 2. Only the "gold" category has a bar with value 2.
